

Quick Corner™

THERMAL PLASTIC SELF-LOCK QUICK NUT...

pushes onto threaded stabilizer post locking the Quick Corner hardware in proper position during installation/removal and periodic floor maintenance

NYLON PUSH-PIN FASTENER...

nylon fastener ensures proper alignment of QC Extension Plate onto the Quick Corner leveler

QC EXTENSION PLATE ...

made from heavy duty 11-ga. stamped steel, the QC Extension Plate is used together with Quick Corner™ when adapting into wood floor systems and extends the corner footprint to outer perimeter edges, providing sturdy support (load transfer) onto stringer grid understructure

QUICK CORNER™ ...

injection molded plastic Quick Corner leveler is available in three (color designated) profiles, each providing 1/4" overall height adjustment in 1/16" increments for flush leveling of the Infinity Air Grate to surrounding floor tiles

VERTICAL STABILIZER POST...

provides positive secure positioning of Quick Corner leveler and QC Extension Plate

CORNER POSITIONING BOSS...

engages with Quick Corner leveler post for secure position and alignment of adapting hardware (also used with optional threaded corner leveler legs- Part Nos. CLL and CLX)
